

F<sup>1</sup> viscosity of less than about 8 cSt at 100°C, (A) from about 15% to about 40% by weight of at least one polymer having a  $\bar{M}_w$  less than 50,000, the polymer being selected from the group consisting of polyalkylene, terpolymers of ethylene, propylene and a diene monomer, and mixtures thereof, and (B) up to about 30% by weight of at least one fluidizing agent, provided that when the fluidizing agent is a poly $\alpha$ -olefin having a kinematic viscosity from about 2 to about 30 cSt at 100°C, then the poly $\alpha$ -olefin is present in an amount up to about 12% by weight, wherein the lubricating composition has a shear loss of less than about 15% in the 20 hour taper bearing shear test.

F<sup>2</sup> 13. (Three Times Amended) A multigrade gear lubricating composition comprising at least about 30% by weight of at least one mineral oil having a kinematic viscosity of less than about 8 cSt at 100°C, and an amount of a concentrate, sufficient to deliver to the multigrade lubricating composition, (A) from about 15% to about 40% by weight of at least one polymer having a  $\bar{M}_w$  from about 1000 to about 45,000, the polymer being selected from the group consisting of polyalkylenes, terpolymers of ethylene, propylene and a diene monomer, and mixtures thereof, and (B) up to about 30% by weight of at least one fluidizing agent, provided that when the fluidizing agent is a poly $\alpha$ -olefin having a kinematic viscosity from about 2 to about 30 cSt at 100°C, then the poly $\alpha$ -olefin is present in an amount up to about 12% by weight, wherein the lubricating composition has a shear loss of less than about 15% in the 20 hour taper bearing shear test.

F<sup>3</sup> 21. (Amended) The composition of claim 13 further comprising an amount of antioxidant sufficient to deliver at least about 0.04% by weight nitrogen to the lubricating composition.

Kindly cancel claim 12, without prejudice.

A version of the above amended claims marked to indicate the specific amendments may be found in the attached Appendix, in accordance with 37 CFR 1.121(c)(1).
